

Flow Fresh™

Urinal Treatment Solution

CARE HOMES HOSPITALITY PUBLIC SECTOR SCHOOLS HOTELS AIRPORTS

Flow Fresh™ is **THE** Urinal Treatment Solution:

- Removes uric crystal build up in urinals and drain lines, removes mineral build ups on the porcelain surfaces and deodorizes at the same time.
- Softens and removes uric crystals from the urinals and drain line, therefore preventing blockages, backups and smells.
- **Cost effective**
- **Removes the need for de-scaling**
- **Reduces blockages**
- **Keeps smells down**
- **Easy maintenance**
- **Easy Installation**

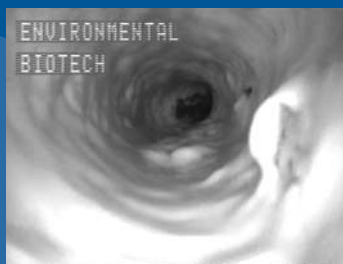

Used now by Dallas Fort Worth Airport in the restrooms in International and Domestic terminals.

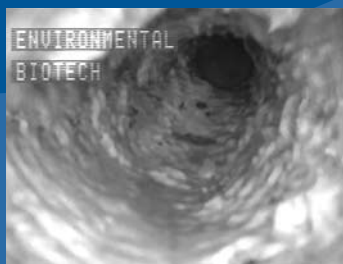

Ashpark House Care Home: "The service from Environmental Biotech has been first class. I'm sure other facilities would benefit from using Flow Fresh™"

Below. Urinals before and after treatment with Flow Fresh.

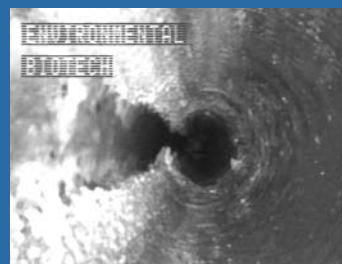

Urinal 1 – before: 50-60% restricted line has large build-up.

Urinal 1 – after 60 days. Less than 10% build-up.

Urinal 2 – before: 70-80% restricted with large build-up.

Urinal 2 – after 60 days. Less than 10% build-up.

The original Urinal Screen – now with Flow Fresh™

- Place this device in urinal for constant freshness and clean drains.
- Flow Fresh™ is now in our Urinal Screens for added benefit to the urinal. It works to stop solids, helps against smells and works against urine on contact.
- Use to complement Flow Fresh™ Urinal Dispensing System.

NEW!

with Flow Fresh™

Use the Urinal Screen in addition to Flow Fresh™ Urinal Dispensing System.
